

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning at page 7, line 11 of the present application as follows:

The closure device 102 further includes a first filament 175, a cap 105, a second filament 145 threaded through a plate 165 and the cap 105 to create a block and tackle 160, a sleeve 140, a collagen sponge 180, and an anchor 185. The cap 105 is located at a proximal end of the closure device 102. The second filament 145 is fixed to the cap 105. The second filament 145 extends from a first end 146, to the plate 165, and back through the cap 105, where it terminates with an optional tab 115. The second filament 145 is separate and distinct from the first filament 175.
